ROAD SAFETY TIPS TO REMEMBER

STOP, LOOK, LISTEN, THINK

Making sure you look both ways before you cross. If there is oncoming traffic don't risk it. Think smart. Look both ways, if you feel unsafe about crossing don't cross.

ALWAYS USE PEDESTRIAN CROSSING

The safest place to cross the road, is the pedestrian crossings. Do not take the risk and be on the look out for road signals. Always look both ways even when it's a green crossing, man!

BE AWARE OF YOUR SURROUNDINGS

When crossing a road, or in a car it is crucial to be aware of your surroundings. Often, we forget things like stopping and looking so it is just as important when in a car to avoid unnecessary distractions.

WHO WE ARE

We are a group of students from the Year 9 LEAD class. Tragically, one of our fellow classmates, Dylan Briggs, passed away following a car accident on his way home from school. We are working with his family to raise awareness on how dangerous our roads can be.
